A NATUREZA É O VERDADEIRO LUXO

Dos mais longínquos vales  
montanhosos europeus, dos  
planaltos e serras do nosso  
Brasil retiramos únicos e  
exclusivos pedaços da  
história do nosso planeta e  
oferecemos em formato de  
obras de arte. Cada peça é  
única, esculpida  
metamórficamente pela  
natureza e todo o seu poder,  
poder esse que dá cores,  
veios, formas que  
impressionam e apaixonam.

A photograph of a bathroom vanity. The central focus is a large, rustic stone basin sink with a modern, brushed metal faucet. The sink is set on a light-colored wooden vanity. The background wall is covered in small, hexagonal, textured tiles in shades of brown and beige. A round mirror with a wooden frame is partially visible at the top. To the left, a stack of white towels is on a woven basket. The lighting is warm and directional, creating strong shadows.

# Cuidados Especiais

## Limpeza e Conservação

### Observações Técnicas | *aspectos visuais*

Mármore e pedras, pela sua origem natural, apresentam variações nos aspectos cromáticos (mármore e pedras) e texturas (pedras), tal característica impossibilita a existência de duas peças iguais.

### Legenda

-  Revestimento, aplicação em parede
-  Pavimento, aplicação no piso
-  Pavimento, piso de baixa circulação
-  Superfície brilhante
-  Superfície mate, fosca
-  Superfície irregular
-  Destonalizado
-  Tridimensional
-  Componentes facetados
-  Presença de juntas
-  Opções de cristais silver ou gold
-  Acabamento frente e verso

\* MTA, Metallic Texture Application (Aplicação de Textura Metálica)

### Mosaicos

Após a instalação, realizar a limpeza com água e sabão neutro ou produtos específicos no mercado.

Não utilizar produtos que possam danificar a superfície das peças.

As peças confeccionadas com mármore anticato recebem uma fina camada de impermeabilizante. Aconselha-se renovar a aplicação de seis em seis meses.

Para os filetes em aço inox, não utilizar produtos abrasivos durante o assentamento e nas limpezas. Quando necessário, realizar polimento.

Evitar ferramentas metálicas e pontiagudas durante o assentamento.

### Nichos

Para limpeza diária, após a remoção de resíduos soltos (com auxílio de aspirador, se necessário), recomenda-se a utilização de água com detergentes neutros ou produtos de limpeza leves que não contenham ácidos, podendo ser empregados também produtos à base de cloro, como por exemplo a água sanitária, diluída em água na proporção de 1 parte do produto para 10 de água, ou em menor concentração.

Após 6 meses aplicar selador de porcelanato para vedação.

Não utilize produtos de limpeza que contenham qualquer ácido, ou que sejam aditivados com limão, flúor etc.

Não recomendamos a utilização de esponjas ásperas ou sabão em pó para limpeza de porcelanatos polidos.

Não utilize ceras para dar polimento.

Evitar o contato de tintas, esmaltes, acetona, vinhos, café,... Caso ocorra, limpar rapidamente com produtos indicados.

Manter constante cuidado com objetos ou detritos que possam arañhar a superfície do produtos (metais, areia, etc.)

### Cristais

Qualquer resíduo proveniente da instalação dos produtos (argamassas, colas de vedação, etc.) deve ser removido imediatamente da superfície do cristal, caso ocorra o contato com este.

A película protetora só deve ser removida do cristal depois de terminada toda a instalação e limpeza pós obra do ambiente.

Para limpeza dos cristais, e área da inserção, não utilize qualquer tipo de ácido ou outro produto corrosivo e jamais remova sujeiras com objetos cortantes ou pontiagudos, a prevenção é a melhor prática contra as manchas e arranhões. A limpeza deve ser realizada com solução de água e detergente neutro, não utilizar esponjas abrasivas, secar com pano macio.

Evite impactos contra a superfície do cristal.
